

Extension Mathematics Year 9

Mathematics is a key learning area within the Victorian Curriculum. The content and process of this course are arranged into three strands: Number & Algebra; Measurement & Geometry; and Statistics & Probability. This course provides students with essential skills and knowledge that will develop the numeracy capabilities that they will need in their personal, work and civic life.

The course aims to extend our students and prepare them for studying higher maths in VCE, including Mathematical Methods.

The text book needed for this subject is *Cambridge, Essential Mathematics, Year 9*.
